We are extremely pleased with our website and its performance. As a result from our website development with 1stBay, our website is more findable on search engines and we have achieved front-page listings on Google and Yahoo for several for our top industry keyword terms. Scott recommended putting a FREE Quote form on our website and it has proven useful for generating sales leads online. 1stBay has great customer service too. When we call 1stBay Web Design we usually get a live person on the phone or a quick call back. We will be sure to use this company for our website needs in the future and strongly recommend them to anyone. Great job Scott! Thanks!!
